18th Annual
**Angus &
Amerifax
Bull Sale**

*Selling
148 Bulls!
& 3 Horses*

Tuesday

March 3, 2009

1:00 p.m. MST at the

Juan Reyes Ranch southwest of
Wheatland, WY

Welcome to our 18th Annual Production Sale!

All Bulls
Tested for
BVD!

All Bulls
Selling
AM Free!

Dear Cattlemen,

Welcome to our 18th annual bull sale. This year our bulls are the same type as always - only better. Deep, thick, moderate framed and easy fleshing with balanced traits. We breed for balanced traits, not extremes in any one trait.

This past year, the buzzword was efficiency. We think efficiency begins with our cow herd. Always using bulls we think will maintain the quality of the herd.

As you have heard through livestock publications, etc., there is a genetic defect in SOME Angus, tracing to a bull named GAR Precision 1680. Only a small number of animals related to him are carriers.

Keep in mind that there are six breeds of beef cattle and one dairy breed that are presently going through defects of one kind or another, not just Angus. The Angus defect is called Arthrogrypois Multiplex (AM) or better known as "curly calf syndrome." The few bulls we are selling that are related to Precision 1680 have been DNA tested free of the AM defect, so you can buy with confidence.

All humans and animals have a few bad genets. With DNA testing we can identify the problem and benefits. Now that we have identified the problems we can all move forward.

Thankfully, this is not a big problem for us. There is no reason for us or you, as our customers to panic. We consider ourselves professionals and have taken a serious approach to eliminate any foreseeable problems.

If you have any questions, please call so we can visit.

We thank all of our loyal customers and friends that have helped make our progress possible.

The Reyes and Russell Families

▶ REYES - RUSSELL ◀

Angus and Amerifax Bull Sale at the Juan Reyes Ranch southwest of Wheatland, Wyoming

Sale Day Phone (307) 322-4847

Tuesday, March 3, 2009

(Storm Date: Friday, March 7)

148 Bulls Sell!

122 Angus Yearlings 18 Amerifax Yearlings
7 Angus Fall Yearlings 3 Ranch Horses

All performance, PAP scores, ultrasound data and pertinent information will be available on sale day. PAP testing was completed by Tim Holt, DVM, Ft. Collins, CO, (970) 221-4535. Complete physical exam and semen testing completed by Steve Lucas, DVM, Wheatland, WY, (307) 322-3640.

Auctioneers:

Lex Madden Cell (307)532-1580

Shawn Madden Cell (307) 532- 1575

▶ VACCINATIONS & MINERALS ◀

A sound cow vaccination program is the foundation for a successful herd health program and improving cow herd immunity. Cow vaccination can have substantial positive carry-over effects in calf health, performance and profitability. The specific benefits for the calf include less calf scours, less bovine respiratory disease (shipping fever), better weaning weights and feedlot performance. This means more calves born, healthier calves that are more disease resistant and better calf performance.

In choosing a vaccine, consider that vaccination with modified live virus (MLV) vaccines has many benefits over vaccination with a killed virus vaccine. These benefits include; a stronger, longer lasting immune response that can be achieved with fewer doses of a MLV vaccine. Also, the immune response that is stimulated with MLV vaccines is currently thought to provide better over all protection than is achieved with a killed vaccine.

Because cows on a killed virus vaccination program generally have less immunity to reproductive diseases than cows given MLV vaccines, a sound vaccination program that utilizes MLV vaccines is in most herds, is the best choice for protective immunity during breeding and throughout pregnancy. We strongly recommend Pfizer Animal Health's Bovishield Gold FP 5 +L5 due to its safety and effectiveness.

A pre-breeding MLV vaccination program for cows should be used initially, since Bovishield Gold should not be given to pregnant cows that have not been previously vaccinated with it. After the initial pre-breeding vaccination with Bovishield Gold, cows can be safely vaccinated at pregnancy check time in following years. We recommend including vaccination for leptospirosis, IBR abortion and BVD Types 1-2 abortion and persistent infections (fetal protection). In herds that use natural/bull breeding, vibrio vaccination is also highly recommended.

One of the most cost effective ways to prevent calf scours is to vaccinate pregnant females with a safe and effective scours vaccine such as ScourGuard 4KC. In order for the vaccine to be most effective, pregnant cows and heifers should be initially vaccinated with 2 doses of vaccine, given in the muscle approximately 3 weeks apart, with the second dose given 3-6 weeks before calving. In following years, females can be vaccinated just once 3-6 weeks prior to calving.

Mineral nutrition is an often forgotten factor that plays a critical role in an animal's ability to mount an immune response to vaccination. Studies have shown that animals on a mineral deficient diet do not respond as well to vaccination or perform as well as animals on a well balanced mineral nutrition program. To be effective, a mineral nutrition program must be properly formulated for the dietary conditions found in your area and fed year round. Generally, block minerals are inferior to loose fed minerals because of lower consumption.
